Update on WM Ottawa Landfill Visual Enhancement Program

Dear Neighbours,

As part of our commitment in keeping you informed on operational enhancements at our landfill site, we would like to advise you that beginning Monday, May 14, 2007 we will be applying topsoil and seeding down the east and south east slope of our site. This work should take approximately two weeks to complete. While we are in the process of applying our topsoil, there is the potential for some odours from this process.

Once the topsoil is completed, we will be seeding these completed sections starting Monday, June 4, 2007. In order to minimize the potential for odours from this process, we will only apply the topsoil from 6:00 am to 4:30 pm Monday to Friday and from 6:00 am to 4:00 pm on Saturdays. We will also be using our high pressure misting system on a 24-hour basis during the period of the application of the topsoil to help prevent possible odours.

If you have any comments or would like to come in and tour our facility, please call me at 613-831-3566 or by e-mail at mwalters@wm.com.

Yours truly,
